Subject: HA43 development

[redacted]

We wish to make some comments about HA43 which will affect us personally and the village of Anstey.

The main objection to the plan HA43 is the increase in traffic that would occur along Bradgate Road and round the Nook at the centre of Anstey. Bradgate Road is the primary route used by people from all over Leicestershire and beyond to access Bradgate Park. Over the last few years there has been a huge increase in visitor numbers to the Park with the resultant increase of traffic on Bradgate Road. A development of houses will greatly increase this traffic. Although the speed limit is 30 mph many cars travel at 40 and some more than 50 mph. More cars will therefore make the situation even more dangerous for residents going in and out of their properties and Bradgate Road will have the traffic density of a major highway.

Over the last few years housing developments in Anstey have meant congestion on the roundabout in the village centre. Hundreds more houses will exacerbate this bad situation.

Sustainability is very important and will not be possible from these proposals. Public transport and cycle lanes in and around the village are insufficient now with the current population. So the environmental impact of more cars in the area will be great.

Please take our concerns into consideration.

Thank you

WENDY AND JOHN SUSCHITZKY
