WHY PLAN NOT SOUND	MODIFICATIONS	HEARINGS	HEARING SESSIONS
LUA3 Land North of Birstall The scale of this development seriously alters and erodes the nature of the community of Birstall, already a very large settlement. The green wedge between Birstall and Rothley/Mountsorrel is severely encroached upon and significantly reduced in size. Incorporation of this development into the village of Birstall adds enormously to the size and demands upon the village, which has already had very large scale developments to its north in the last ten years. The distinction between Birstall and greater Leicester is further reduced by this proposed development. The housing density adds significantly to the the population of Birstall and the through traffic along the A6. Although reference is made in LUA3 for 'protecting the separate identity of Wanlip, Rothley and Rothley Conservation Area;' this does not offer consideration for the separate identity of Birstall. The large scale removal of the green space significantly reduces such separate identity and does not 'protect and enhance existing wildlife corridor'.	Severe reduction in the scale of LUA3 and preservation of the green wedge north of Birstall with any new developments being made on the outskirts of Rothley. Removal of the LUA3 development altogether. These will meet the requirements to preserve local community identity and uniqueness, preserve the green wedge, area of separation, and environment.	No

3.195 Environmental Context This very large development seriously depletes the green wedge between Syston town and Barkby Thorpe/Thurmaston. Serious recent encroachment and reduction of the green wedge has already taken place in the areas adjacent to HA1, HA2 and HA3. This proposal is in breach of the declaration of 'the importance of settlements remaining distinct and separate places', and of maintaining significant 'Areas of Local Separation'. The community identity is at risk of being subsumed into the greater Leicester area and identity.	Removal of HA1 proposed development.	No

WHY PLAN NOT SOUND	MODIFICATIONS	HEARINGS	HEARING SESSIONS
HA14 Land off Cliffe Road/Henson Close, Birstall This proposal overturns the previous designation to protect the green wedge land between Birstall and Leicester City and reduces the size of the green wedge significantly It also involves building across a public footpath. It encroaches on a local wildlife site.	Remove HA14 Land off Cliffe Road/Henson Close, Birstall proposal completely and retain green wedge as originally designated.	No
