Subject: Observations reference HA43 planned residential development proposals for Anstey

Follow Up Flag: Follow up
Flag Status: Completed

Dear Sir? Madam

The continual residential development of Anstey is causing a number of issues to the already overburdened services and residents within our Village. What was once a Village in the Charnwood District of the County is now becoming an extension of a City suburb and is causing many anxieties for local residents, namely;

- The impact on the environment and the wildlife within it, due to the constant building works and loss of local habitat.
- The impact on the health and safety local population due to the ever increasing levels of pollution, caused by the ever increasing numbers of vehicles on local roads. There is not and has not been any increase on the local road infrastructure to deal with current levels, never mind the increased levels that will result if these proposals are approved.
- School sizes, Health centres and other support services continue to remain stagnant whilst the population and numbers of residential dwelling continues to overburden them.

For the above reasons i strongly object to the proposals outlined within this plan

Regards, Kevin Pearson
