WHY PLAN NOT SOUND	MODIFICATIONS	HEARINGS	HEARING SESSIONS
Dear reader, [redacted] close to where fishpool brook crosses Sileby road. The brook is normally a small trickle, but after heavy rainfall the water level rises and floods much of the village and it's roads. Many of the estates throughout barrow drain into fishpool brook, and the latest development in the village has increased the rate at which water drains into the brook. This has caused ingress into some of my neighbours houses costing them significant sums of money. The village already struggles with flooding. Laying new roads and taking away the natural soakaways is only going to exacerbate flooding in the area. I'm not against new developments in barrow per se, but fishpool brook can't take another development draining into it without damaging the houses of those residents downstream.	I'm order to not exacerbate flooding and property damage to those downstream of fishpool brook; any new development must run its drainage away from the already overloaded brook. This would mean that the development Is not causing property damage and be legal	Yes	I want to challenge any decision to have the run off from any new development into fishpool brook
