Subject: Local planning in Thrussington

Proposed developments in Thrussington HA67 and HA68

Sewerage and Water

The above are a great problem to our village. If you could guarantee that their would be no more problems with the sewerage and storm water the village could cope with a small number of houses but not 90 . Both of these areas are problems in Back Lane and a catch pit in our garden is full of silt with no outlet to a ditch.

Traffic

The village struggles with traffic as it is . We have heavy farm machinery regularly through the village from Ratcliffe road and up OldGate road. It's dangerous at junctions at both Old Gate road and Regent street. Pedestrians have difficulty crossing the road and it is particularly hazardous for children.

Transport

There is no bus service in the village. It is a 1 1/4 mile wake to the nearest bus which is too far for older people with no transport.

Wild Life

The village is teaming with wild life. The building of these houses will impact on the environment.

We believe the houses will ruin the character of our village and are unable to sustain them.
