

1. Sport England

Dear Sir, Madam,

Thank you for consulting Sport England on the above neighbourhood plan. Please note our concern with respect to the use of robust and up to evidence below.

Government planning policy, within the **National Planning Policy Framework (NPPF)**, identifies how the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. Encouraging communities to become more physically active through walking, cycling, informal recreation and formal sport plays an important part in this process. Providing enough sports facilities of the right quality and type in the right places is vital to achieving this aim. This means that positive planning for sport, protection from the unnecessary loss of sports facilities, along with an integrated approach to providing new housing and employment land with community facilities is important.

It is essential therefore that the neighbourhood plan reflects and complies with national planning policy for sport as set out in the NPPF with particular reference to Pars 96 and 97. It is also important to be aware of Sport England's statutory consultee role in **protecting playing fields** and the presumption against the loss of playing field land. Sport England's playing fields policy is set out in our Playing Fields Policy and Guidance document. https://www.sportengland.org/how-we-can-help/facilities-and-planning/planning-for-sport#playing_fields_policy

Sport England provides guidance on **developing planning policy** for sport and further information can be found via the link below. Vital to the development and implementation of planning policy is the evidence base on which it is founded. https://www.sportengland.org/how-we-can-help/facilities-and-planning/planning-for-sport#planning_applications

Sport England has worked with Charnwood BC to ensure their Local Plan is underpinned by robust and up to date evidence. In line with Par 96 and 97 of the NPPF, this takes the form of **assessments of need and strategies for indoor and outdoor sports facilities**. A neighbourhood planning body should look to see if the relevant local authority has prepared a playing pitch strategy or other indoor/outdoor sports facility strategy. If it has then this could provide useful evidence for the neighbourhood plan and save the neighbourhood planning body time and resources gathering their own evidence. It is important that a neighbourhood plan reflects the recommendations and actions set out in any such strategies, including those which may specifically relate to the neighbourhood area, and that any local investment opportunities, such as the Community Infrastructure Levy, are utilised to support their delivery.

In this regard Sport England is **concerned** that the plan refers to the "Open Spaces, Sport and Recreation Study, 2010" and the "Open Spaces Strategy 2013-2028" but not the most up to date studies and strategies the studies used are out of date and therefore the plan is not sound.

Open Spaces and assessment Study 2017

Indoor Built Sports Facilities Strategy 2018

Playing Pitch Strategy 2018

It is understood that the above studies have informed the Open Spaces Strategy 2019 it appears therefore that the plan should be reviewed and updated to take account of the updated evidence.

If **new or improved sports facilities** are proposed Sport England recommend you ensure they are fit for purpose and designed in accordance with our design guidance notes.

<http://www.sportengland.org/facilities-planning/tools-guidance/design-and-cost-guidance/>

Any **new housing** developments will generate additional demand for sport. If existing sports facilities do not have the capacity to absorb the additional demand, then planning policies should look to ensure that new sports facilities, or improvements to existing sports facilities, are secured and delivered. Proposed actions to meet the demand should accord with any approved local plan or neighbourhood plan policy for social infrastructure, along with priorities resulting from any assessment of need, or set out in any playing pitch or other indoor and/or outdoor sports facility strategy that the local authority has in place.

In line with the Government's NPPF (including Section 8) and its Planning Practice Guidance (Health and wellbeing section), links below, consideration should also be given to how **any new development**, especially for new housing, will provide opportunities for people to lead healthy lifestyles and create healthy communities. Sport England's Active Design guidance can be used to help with this when developing planning policies and developing or assessing individual proposals.

Active Design, which includes a model planning policy, provides ten principles to help ensure the design and layout of development encourages and promotes participation in sport and physical activity. The guidance, and its accompanying checklist, could also be used at the evidence gathering stage of developing a neighbourhood plan to help undertake an assessment of how the design and layout of the area currently enables people to lead active lifestyles and what could be improved.
