Subject: Proposed 90 new houses in the village of Thrussington

I am writing this email to raise my strong objections to the recently announced plans by Charnwood council to the development of a total of 90 new houses on two separate developments in the village of Thrussington.

[REDACTED] in the village and wish to raise the strongest of objections to the plans as to such a huge increase of nearly 40% to the current number of properties.

A development of this scale would have a devastating and irreversible impact on the character and environment of the village of Thrussington and is completely unsound in terms of the logic and reasons to proceed with.

There are a number of issues that have been ill thought through and in fact errors in the logic and points stated by Charnwood to support their proposal in the areas of the environment, traffic congestion, safety of residents, lack of appropriate services in retail ,medical and transport.

Thrussington is a classic example of a small English rural village, centred around the village green and supported by a strong and active farming community. The proposal to increase the number of homes in such a village by 40% surely is unsound and ill thought through.
