Dear Charnwood Planners,

I'm writing this in response to the Charnwood Local Plan consultation.

In light of the current climate emergency as described in the IPCC report released a few days ago, strong action is required immediately.

This Local Plan does not require strong action towards combatting climate change. The NPPF requires action on the climate as do national targets – and this plan fails to put in place policy to do this. I therefore believe this Plan should be rejected and rewritten with much clearer and unequivocal climate policy.

I'm particularly concerned that new housing developments should be required to be zero carbon and that wind farms with the largest and most efficient turbines be supported.

By the next Local Plan it will be too late to take effective action against the climate crisis.

Please rewrite this one before going ahead with it.

Thankyou,

Tamar Morton Jones
