WHY PLAN NOT SOUND	MODIFICATIONS	HEARINGS	HEARING SESSIONS
<p>Policy CC4 on p173 states that you will require all new developments to take account of sustainable development principles "by encouraging high standards of energy efficiency...in passive solar design".</p> <p>If the Local Plan is to be sound, some indication of the amount of solar design should be given. Subject to Policy CC3 p171 "proposals for low carbon installations will be supported where any adverse impacts ..have been fully addressed" I urge that encouragement of solar design be replaced with the "requirement to provide every new house with solar panels for electricity generation".</p>		No
