Mr Nick Hetzel	Yes	Yes	Yes	Policy		Table 7 on page 171			

WHY PLAN NOT SOUND	MODIFICATIONS	HEARINGS	HEARING SESSIONS
<p>Table 7 of page 171 details existing renewable installations in Charnwood. Please include the other 2 other medium scale wind turbines east of Wymeswold, both on land off Narrow lane.</p> <p>The first, which we operate, is at Glebe Barn Farm, 2km east of Wymeswold. This is rated at 0.8MW, the second, 2km south east from Glebe Barn Farm, at Lodge Farm, is a similar physical size, (48m rotor on a 55m tower), but is only rated at 0.5MW. Incidentally both of these turbines are marked on your Policy Map 1.</p> <p>Inclusion of these two turbines would not only be a more accurate representation, it would take the installed wind energy capacity figure in the Local Plan from 2.57MW to 3.87MW. This is an increase of 50% on the current figure.</p> <p>There are also many other small wind turbines, mostly in the wolds area, which are not included in this total. These are a similar in scale to the two at West Beacon Farm. For consistency they should either all be included, or more pragmatically the ones West Beacon Farm, due to their small domestic scale, should be excluded as they contribute little to the overall total, (West Beacon Farm Turbines are rated at 0.05MW total, or 1.3% of the revised total). This would then also be consistent with the smaller domestic solar installations that are also excluded from the installed solar capacity total.</p> <p>Many thanks,</p> <p>Nick Hetzel</p>		No
