Charnwood Local Plan 2021-2037

This plan 'To protect landscape character and settlement separation' will remove precious areas of green wedge, farmland and areas of separation between the villages of Syston, Barkby, Queniborough and Thurmaston, so on top of the already approved 4500 homes the plan map of HA land shows that you want to add a further 1600 homes to this small area of Charnwood. This plan will result in a huge increase to the population in our area which in turn will lead to a substantial increase in road traffic through our villages causing a large amount of extra air pollution (until the advent of electric cars) and long queues of traffic, also a huge increase in pressure on our local GP services and school places whilst waiting for new ones to be built.

In this time of global warming this plan will be covering large areas of land in concrete that would be capable of storing carbon dioxide and it would be reducing its ability to absorb rain water thus preventing flooding.

As residents of Thurmaston my wife and I think that for all the reasons above this plan is UNSOUND and Charnwood Council should look to share the number of homes required with other parts of the Charnwood area and look towards using more brownfield land.

Mr & Mrs G Braybrook
