HA18 in Loughborough is next to ancient woodland and a huge amount of land designated for employment opportunities including a hotel and apartments for those visiting the uni and science park. These fields, given the low lying land and water that often collects there, should be planted up as additional woodland to create a greater boundary between employment land and large buildings, protecting the Nanpantan residents and the local wildlife from the impact of the LSEP development. As per the attached plan - add woodlands to the south of the uni development. In case the upload fails it is the LSEP Concept Masterplan Framework from 2016 and shows plans which propose natural spaces between the development zones (not a housing estate!)
