LOCKED

Record and register your bike –www.immobilise.com.

Keep a note of your bike's frame number, it could help to identify it if it is stolen.

The frame number is often located under the crank shaft.

Ideally, use two secure-rated locks for maximum security when locking your bike.

If using two locks secure both of them to each wheel and the frame.

If using one lock secure it the wheel and the frame.

Always lock the frame to a solid object such as a bike stand.

When buying a lock look out for the security rating, 1-10, 10 offers the most security.

Remove all your bike accessories every time you leave it unattended.

Always lock a cycle when leaving it, even if it is only for a few minutes.
