

'Make it'

Recycled Robot Fun

Make a Robot and save the Planet!

You will need,

- Some Loo Roll middles
- White Paper
- Scissors
- Pens and pencils
- Glue

How to make

- On the white paper draw some simple shapes, squares, circles triangles. These will make 'robot' eyes, noses, mouths.
- Add some other shapes like lightening, heavy boots, grilles, dials and clocks.
- HINT - keep your drawings as small as you can so they will fit on the Robot body.
- Outline your drawings in black pen, then add a few colours and lots of dots to look like rivets holding everything together.
- Carefully cut out your shapes . HINT- they will be easier to cut out if you leave some white paper around the shapes And they will still look good!
- Stick your Robot parts onto the body (the Loo Roll).
- Make more and conquer waste with your Robot Army!!
