

Matter 5 Supplementary Written Statement – Mulberry Land

I would like to confirm that comments previously submitted by Mulberry Land still apply.

In addition, I would like to add, if I may, given that we continue to promote 17 hectares of land north of Syston Road, Cossington as highly suitable employment land in close proximity to the A46 for logistics operations. We support the notion that an additional 10ha in excess of the identified need for employment land is appropriate in supporting the economic growth of the authority area and beyond. The Plan must allow for the identification and delivery of sites for larger scale units, in excess of 9,000sqm to allow for a range of employers and national logistics companies to invest in the region. We agree that there should be specific reference within policies of the plan to promote the need for logistics and warehousing floorspace to 2041.
