

Matter 6 Written Statement – Richard Guise

HA15 Land South of Loughborough

While I'm doubtless not following the correct, tortuous procedure, you and the inspectors may want to be aware of four errors on Policies Map 1 of Charnwood Local Plan 2021-37. Four areas marked as empty are in fact already built on, as shown in the attached JPG. I expect those responsible will claim the reason is that the base OS map was out of date. However, if they're able to superimpose their own planning data, surely they're also capable of superimposing updated current information. The significance is that the combined effect of the errors makes the area of separation between Loughborough and Quorn look bigger than it really is. If the council can't even represent the status quo correctly, how competent are they likely to be in planning for the future?

Extract from Policies Map 1 of Charnwood Local Plan 2021-37

B = Already built on
