

## **Charnwood Local Plan – Post Hearing Consultation Response**

### **A L Tomalin**

I am extremely concerned about the plan by Bloor Homes to build over 1300 homes on the land at Laburnum Way.

This would create more traffic in Hazel Road, which is already far too busy and dangerous, particularly the bend near the allotments. This road was not designed for the number of cars currently using it, let alone the additional 1300 plus cars which will be generated by the new houses.

No more traffic should be using Hazel Road, especially as there is a school very close by and children from this school and other schools will be in even greater danger from speeding traffic. Local residents currently struggle to get in and out of their drives safely and the danger to cyclists from speeding vehicles is immense.

Consider the environment and sustainable transport, but do not allow more vehicles to use an already overstretched road.
