

- J The Northern Boulevard
The formal route into the suburb with specimen tree planting in grass verges or to the rear of the highway footway. Announced by the Lodges (Ja) and circus of trees.
Formally defined by clipped hedging or with the open grass of the parks running up to its edge allowing sweeping views across the parkland landscape
Street lighting laid out between the trees
Soft islands at junctions allow for feature tree planting creating landscape incidents along the boulevard
- K Broadnook Spinney South
New woodland tree planting and shrubs margins widen and augment the existing mature hedge to extend the spinney character forming a biodiversity corridor
Walking and cycling routes link the southern neighbourhoods to the northern parks
- L Three Parishes Park
A formal park laid out at the end of Central Walk
Radial routes lead away from the formal gardens to link to neighbourhoods the west
The formal gardens are laid out with mixed planting beds and defined by an arc of clipped hedging
Evergreen trees define the space with formal gates and pillars to the end of Central Walk
Beyond the gardens the formality breaks down where the wooded character of the spinney flows across the space
An equipped area for natural play sits within and under the mature trees
Mounding adds to the play experience and also act as raised viewing points to see Bradgate Park
- M The Northern and Western Woods
New belts of woodland and a new spinney are laid out across the upper slopes of Rothley and Thurstaston Brooks placing an extensive robust component into the landscape
These woods create new biodiversity corridors linking Broadnook Spinney (D) to Brindle Road Spinney (M1) and Second Alley Spinney (M2) and onward to the landscape beyond
Footpaths skirt the woods but access is restricted to one connection down to the bridleway in the valley below
